HIGHLIGHTS OF QUALIFICATION

- Flutter Developer with hands-on experience building scalable and high-performance mobile applications using Flutter, Dart, and REST APIs.
- Proven ability to deliver end-to-end application development, from UI design to deployment, for e-commerce, gaming, and government service platforms.
- Proficient in Agile methodologies, Clean Architecture, and SDLC, enabling efficient development cycles and maintainable codebases.
- Experienced in using tools such as Android Studio, VS Code, GitHub, Postman, and Firebase for development, testing, and integration.
- Currently seeking opportunities to apply strong technical, problem-solving, and architecture design skills in creating impactful digital products.

EDUCATION

Master of Computer Applications (MCA) (GPA:8.80 /10) Jain University, India Relevant courses: Software Engineering, Data Structures, Mobile Application Development, Database Management Systems, Web Technologies, Cloud Computing	2022 – 2024
Bachelor of Computer Applications (BCA) (CGPA: 8.76/10) Veer Narmad South Gujarat University, India Relevant courses: Relevant coursework: Object-Oriented Programming, Data Structures, Computer Networks, Database Systems, Python Programming	2019 - 2022

TECHNICAL PROFICIENCY

Languages & Databases: Dart, Python, PHP, Kotlin, Flutter, Unity.

Web & Backend Technologies: REST API, Firebase, JWT

Database Technologies: MySQL, SQL, NoSQL, Firebase Realtime Database.

Development Tools: Android Studio, IntelliJ IDEA, Visual Studio Code, GitHub, Postman, Docker.

Project & Design Tools: Figma, JIRA, Notion

Development Methodologies: Agile, Scrum, Software Development Life Cycle (SDLC)

Architectural Patterns: Clean Architecture, Modular Codebase, MVVM (where applicable).

PROFESSIONAL EXPERIENCE

Senior Flutter Developer: Innocreek Solutions	December 2024 - Present
<ul style="list-style-type: none">Built customized mobile applications from scratch using Flutter and Dart, tailored to diverse client requirements across industries.Collaborated with cross-functional teams to deliver full-cycle development, ensuring scalable solutions with 60% improvement in customer engagement.Applied Clean Architecture principles and integrated REST APIs to boost app performance and maintainability.Managed deployments using Firebase and contributed to Agile sprints, ensuring on-time delivery of high-quality products.	
Senior Flutter Developer: Aidges Infotech	July 2022 – Present
<ul style="list-style-type: none">Led development of end-to-end e-commerce applications using Flutter and Dart, enhancing user experience and streamlining business operations.Delivered scalable solutions that improved customer engagement by 60% through effective architecture and clean code practices.Integrated RESTful APIs and Firebase services to support secure, real-time functionality.Participated in sprint planning and cross-team collaboration to drive consistent delivery and code quality.	
Senior Flutter Developer: Keypress IT Services Pvt. Ltd.	July 2022 - December 2024
<ul style="list-style-type: none">Developed mobile apps for government and gaming sectors using Flutter and Dart, driving 80% boost in user engagement.Designed reusable UI components and applied RESTful API integrations to deliver responsive, scalable solutions.Collaborated with design and QA teams to iterate on UI/UX and ensure functional parity across Android and iOS platforms.Used Agile methodology to coordinate development tasks and maintain continuous delivery pipelines.	

PROJECTS

BSL Kavach – Safety Observation & Survey App (SAIL)

- Developed a mobile application using Flutter and Dart to streamline safety observations (AART reporting) within SAIL’s BSL unit, enhancing Environment, Health, and Safety (EHS) outcomes.
- Implemented survey functionality for both BSL and non-BSL employees to collect structured safety data aimed at improving industrial safety standards.
- Designed intuitive UI/UX for seamless reporting and surveys, supporting multiple user roles and increasing participation in safety compliance efforts.

MARKET WOLF – Mobile Trading Platform

- Designed and developed a mobile trading platform using Flutter and Dart, offering users streamlined trading features and real-time market data alongside curated educational content.
- Integrated a user-friendly interface that simplifies navigation and trade execution, catering particularly to beginners and casual investors.
- Optimized state management and backend performance through RESTful API and Firebase integration, ensuring a seamless and reliable trading experience.
